Comprehensive and Integrated Health Care

Our patient centered medical home is health care focused on you, the patient. It is a partnership between you and your provider. Your provider leads a team of health care professionals committed to improving your overall health and to helping you reach your personal health goals.

The patient centered medical home focuses on connecting the dots of coordinated care for each patient. Your health team may consist of your primary care provider, nurses, specialty physicians, pharmacists, dietitians, care coordinators and others depending on your needs. For example, do you want to quit smoking? Better control your diabetes or asthma? Lose weight? Manage your stress? Your medical home provider will put the right team in place for you.

The Goals of a Patient Centered Medical Home (PCMH) include:

- A discussion with your provider regarding your health care goals.
- Asking for your input in planning your care and designing a plan which you can follow.
- Exploring methods to appropriately care for you, and ways to help you care for yourself.
- A reminder when appointments or tests are due so that you may receive the highest quality of care.
- Provide access to medical care 24 hours a day, 7 days a week.

The Patient Centered Medical Home concept includes an agreement between the provider and the patient that acknowledges the role of each in a total health care program. We will always respect you as an individual without discrimination, including your privacy and confidentiality. We will remain committed to providing the highest quality of care and professionalism.

Care Coordination

If you are hospitalized, following up with your Primary Care Provider is essential to your recovery and minimize possible complications. You should schedule an appointment with your Primary Care Provider within 7 days after discharge. Care Management Services are available to assist you with transportation needs, education, or other challenges. For more information or to access services, please contact our care coordinators at (844) 368-1817.

Spec Info:

Emergencies

Regardless of the time of day or night, if medical attention is needed please contact our office for medical advice, emergency care, and/or guidance to our preferred after-hours care facility. Call 911 or go directly to the nearest emergency room if you are having any of the following:
