PATIENT SUCCESS STORIES

Evelyn, who is in her early 70's, was experiencing leakage for two years before she found out about physical therapy as a treatment option. She was able to stop taking the incontinence medication after a couple of weeks of therapy and now drinks caffeine without problems.

"Many women do not like to discuss this problem, but I never felt uncomfortable talking with her, even from the beginning. She gave me exercise techniques to do as she saw I could take them on. She never rushed me."

Tammy suffered for over a decade with vaginismus, a condition that makes routine pelvic exams and intercourse very painful or in severe cases, impossible.

"I was a nurse practitioner at my primary care doctor's office that told me about physical therapy as a treatment option. It was not even two months of going to physical therapy that I was able to have intercourse with my husband without pain for the first time in ten years."

SERVICES

- Pelvic Pain
- Nigral Pain and Dysfunction
- Pregnancy/Post-Pregnancy Related Pain
- Bladder Dysfunction
- Osteoporosis
