HEALING THROUGH ART
Healing Through Art is a collaborative effort between McLaren Flint and the Flint Institute of Arts dedicated to the promotion of healing for cancer patients through the creative visual arts process. This is a free resource to cancer patients.

Art Therapy is an established mental health profession that uses the creative process of art making to improve and enhance the physical, mental, and emotional well-being of people. Through the art making process, art therapists assist their clients in using their artwork as a reflective tool.

Art therapy is used with adults, families, and groups to assess and treat:

- anxiety, depression, and other mental/emotional problems
- and relationship issues
- social/emotional difficulties related to disability or illness
- personal trauma and loss
