Improving Quality of Life for Our Patients

"Sometimes, I felt like I was going to lose my breath because of the pain. My family doctor sent me to the Pain Management Center for evaluation and treatment. They started me on a regimen of nerve blocks with low-impact steroids and exercise. The Pain Center has made a huge difference in alleviating pain and helping me regain mobility and function."
-Patient S.H.

"I've had years of back pain, back fusion surgery and spinal arthritis. I couldn't walk 50 feet without feeling pain. My family doctor referred me to the Pain Management Center. I had a first series of facet injections in my lower back, which started to calm things down. Now I'm going through my first series of epidural injections and can walk more than 50% without pain, and on a scale of 100, I'm feeling 99% pain relief. I'm going to be in control, and with the Pain Center's help, I am not going to hurt forever."
-Patient L.W.
